Passive Networks:
Visualizations and Social
Networking

About Your Passive Networks

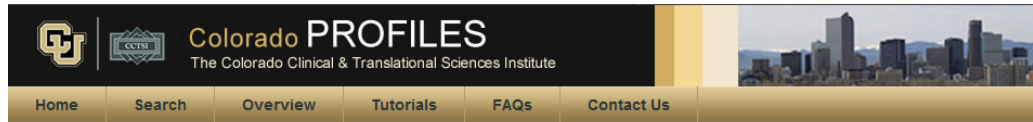

Passive Networks are formed automatically when you share common traits such as being in the same department or building, co-authoring the same paper, or researching the same topics.

Passive Networks include:

- Concepts
- Co-Authors and Similar People
- Same Department and Physical Neighbors

*Passive Networks are shown in the **right** panel of the page when viewing a profile.*

Passive Networks - Concepts

Concepts are derived automatically using “MeSH” terms from the PubMed articles listed in the bibliographic section of your profile.

Concepts are updated within 72 hours of modification of publications by you or your proxy.

John Doe [Profile](#)

Concepts (33)
Concepts are derived automatically from a person's publications.

Cloud **Categories** **Timeline** **Details**

In this concept 'cloud', the sizes of the concepts are based not only on the number of corresponding publications, but also how relevant the concepts are to the overall topics of the publications, how long ago the publications were written, whether the person was the first or senior author, and how many other people have written about the same topic. The largest concepts are those that are most unique to this person.

Passive Networks – Co-Authors and Similar People

Lists of co-authors and similar people are derived automatically from publications.

Use the “See all....” links at the bottom of each network list to view more information.

Co-authors and similar people are updated within 72 hours of modification of publications by you or your proxy.

Navigate Co-Authors

The screenshot shows the Colorado PROFILES website. The header includes the title 'PROFILES' and 'Colorado Translational Sciences Institute'. Navigation links include 'Tutorials', 'FAQs', and 'Contact Us'. On the left, there is a search form with fields for 'Keyword', 'Last Name', and 'Institution', and a 'Search' button. Below the search form is a 'Menu' with links: 'Find People', 'Find Research', 'Overview', 'Tutorials', 'FAQs', 'View My PROFILE', 'Edit My PROFILE', 'Manage Proxies', and 'Logout'. The main content area is titled 'Co-Authors (10)' and includes a description: 'Co-Authors are people in your field who have published together'. Below this are tabs for 'List', 'Radial', 'Cluster', 'Timeline', and 'Details'. The 'List' tab is selected, showing a two-column list of co-authors. On the right, there are sections for 'Doe's Networks', 'Concepts', 'Co-Authors', and 'Similar People'. Five callout boxes provide instructions on how to navigate the page.

3. The List View contains a linked list of all Co-Authors for a specific individual. Links for individual co-authors provide direct access to that Co-Author's profile

4. Click here to see the Radial view

2. Co-Authors can be viewed by List, Radial, Cluster, Timeline or with Details.

1. Click here to open this Co-Authors page

Co-Authors (10)
Co-Authors are people in your field who have published together

List Radial Cluster Timeline Details

- Abman, Steven
- Accurso, Frank
- Ambruso, Daniel
- Daniels, Stephen
